

# 650 Series Core Barrel

The Canamera 650 Series Core Barrel is the most versatile coring platform within the industry providing larger hole size range, longer configurations and multiple platforms.

## Tool Applications

- Four inch Jam Mitigation
- Long Barrel - 600 ft+
- Wireline Retrieval
- Standard Conventional Coring
- Offshore or Land
- Directional or Horizontal

## Features and Benefits

- Lowest pressure drop within industry
- Largest compatible hole size range
- Longest configurations - 600 ft+
- Multiple inner barrel configurations

SPECIFICATIONS	
Hole Size Range	7-7/8" - 9-7/8" (200 mm to 229 mm)
Core Diameter	4" or 4.50" (102 mm - 114 mm)
Outer Tube OD	6.50" (165 mm)
Top Connection	4-1/2" IF
Length	30 ft increments (9 m increments)
Make up Torque	25,000 ft-lbs (34,000 Nm)
Yield Torque	40,000 ft-lbs (54,000 Nm)
Tensile Yield	402,000 lbs (179,000 daN)
Weight on Bit	4,000 - 24,000 lbs (1,800 daN - 10,700 daN)
Fluid Flow Range	250 - 400 gpm (950 - 1,510 l/min)
