

# 700 Series Core Barrel

*With larger hole size range, longer configurations, and multiple platforms, the Canamera 700 Series Core Barrel is the most versatile coring platform within the industry.*

## Tool Applications

- Four inch jam mitigation
- Long barrel - 600 ft.+
- Wireline retrieval
- Standard conventional coring
- Offshore or land
- Directional or horizontal

## Features & Benefits

- Lowest pressure drop within the industry
- Largest compatible hole size range
- Longest configurations - 600 ft +
- Multiple inner barrel configurations

SPECIFICATIONS	
Hole Size Range	8-1/2" - 9-7/8" (216 mm - 251 mm)
Core Diameter	4.00' and 4.50' (102 mm and 114 mm)
Outer Tube OD	7.00" (178 mm)
Top Connection	4-1/2" IF
Length	30 ft increments (9 m increments)
Make Up Torque	30,000 ft-lbs (41,000 Nm)
Yield Torque	44,000 ft-lbs (59,656 Nm)
Tensile Yield	565,000 lbs (251,000 daN)
Weight on Bit	4,000 to 24,000 lbs (1,800 daN - 10,700 daN)
Fluid Flow Range	250 - 400 gpm (946 - 1,510 l/min)
